## 2-digit problem

On Planet Oryx there are only 500 people.
Every person is about to get a phone.
The phone company wants to work out how many digits to have in the phone numbers.
I. If they have just 2 digits in each phone number, will they get enough different phone numbers for everyone?

| Name | Phone number |
| :--- | :--- |
| Aber | 01 |
| Aztema | 02 |
| Bambam | 03 |
| Binny | 06 |
| Bol | 11 |
| Booger | 12 |
| Cal | 28 |

2. If they have 3 digits in each phone number, will they get enough different phone numbers for everyone?

| Name | Phone number |
| :--- | :--- |
| Aber | 001 |
| Aztema | 002 |
| Bambam | 003 |
| Binny | 016 |
| Bol | 101 |
| Booger | 102 |
| Cal | 028 |
