## you need:

- two l-6 dice (with numerals if possible)

## Find all the numbers

## for one person or two people working together

I. Roll the dice and arrange them to make a two-digit number, like this:

2. Write the number in any box on the grid.
3. Roll the dice again, to make another number. Write that in the grid too. But don't write the same number twice.

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

4. Can you fill the grid with different numbers?

You don't need to keep rolling - you can just arrange the dice to make numbers.

You might even be able to work them out in your head.
5. Now copy out the numbers you wrote. This time put them in order.

What patterns can you see?

| 11 | 12 | 13 |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
