

you need:

- counters
- two 1–6 dice

Planetary wars

 for 2 players**First of all**

Decide who owns Mars and who owns Saturn.
Read out your planet numbers.

When it is your turn

Roll the dice and arrange them to make a two-digit target number.

Both players must choose one of their planet numbers.

They find $\frac{1}{2}$ or $\frac{1}{3}$ or $\frac{1}{4}$ of that number.

Whoever is closest to the target number wins a counter.

The end of the game

Keep playing until one player has 10 counters.

Does the game seem fair to you?

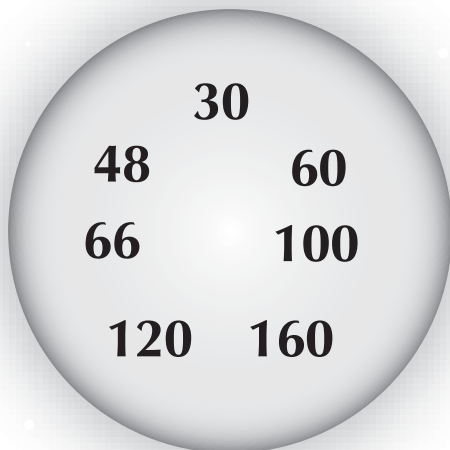

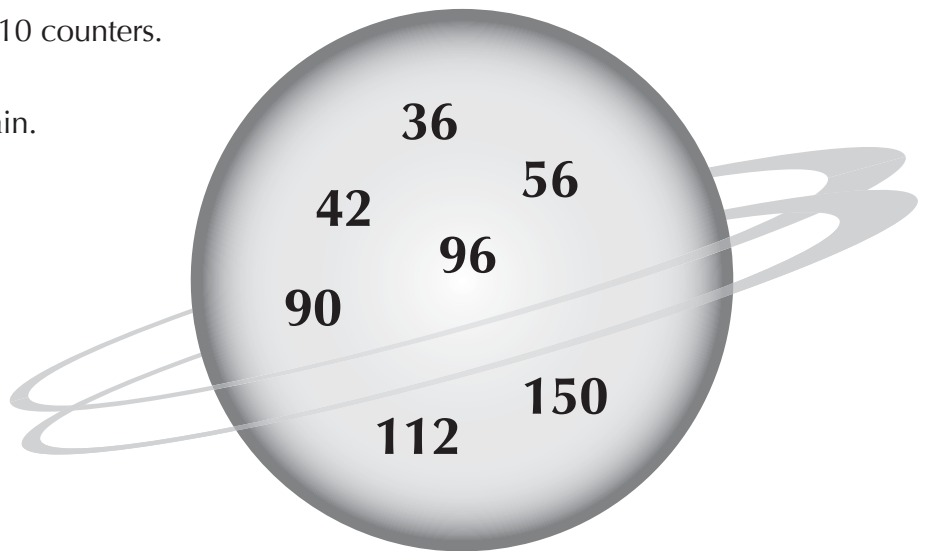

Try swapping planets and play again.

Which planet wins this time?

Rules

You may use your planet numbers as often as you like.

If you both get equally close to the target number, you both win a counter.

**Mars****Saturn**
