

Number puzzle

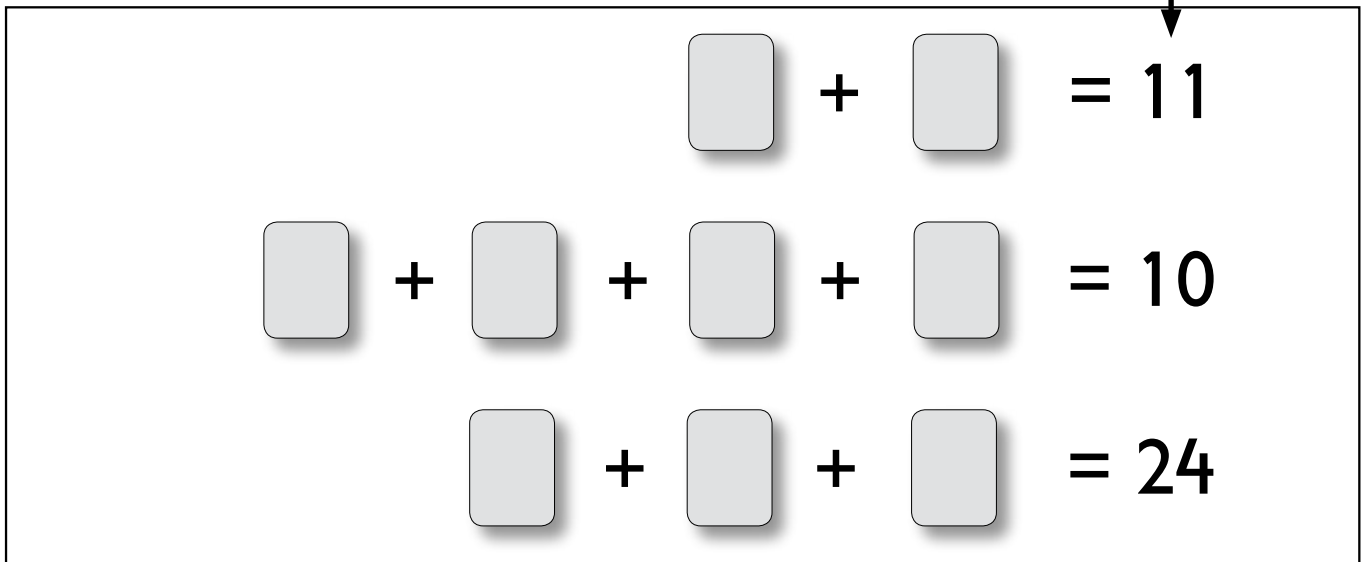

Chloe had nine digit cards.

She arranged them to make these totals.

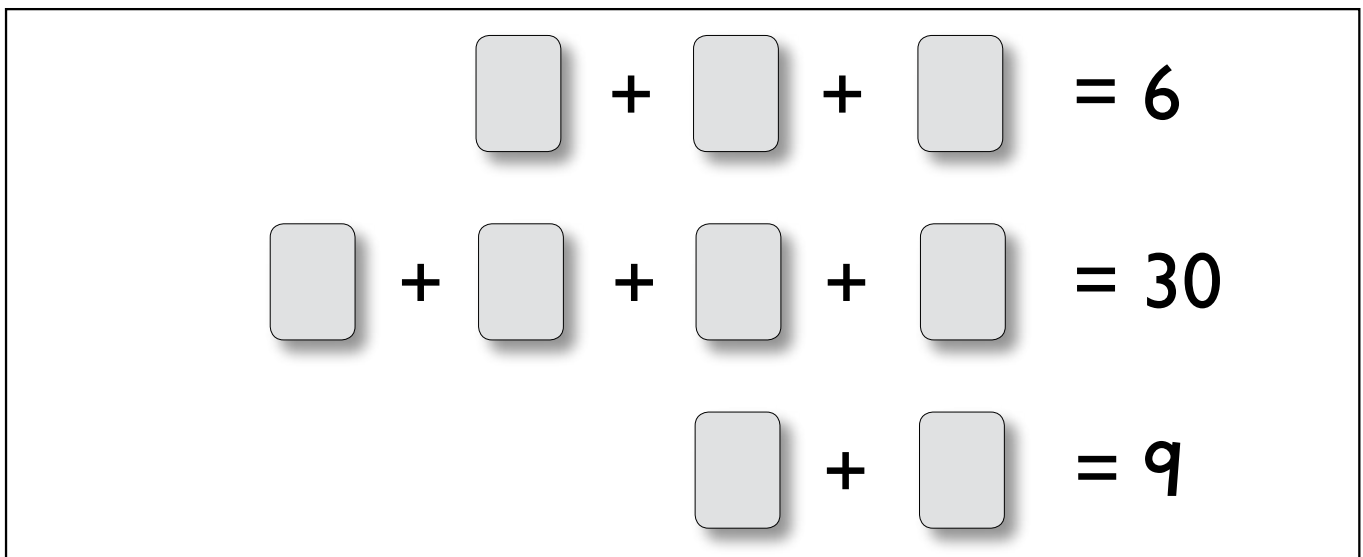

Then she turned the cards face down.

Can you work out the number on each card?

$$\begin{array}{rcccl} & & \square & + & \square & = & 11 \\ & \square & + & \square & + & \square & + & \square & = & 10 \\ & & \square & + & \square & + & \square & = & 24 \end{array}$$

Then she re-arranged them to make some new totals.

Can you work out the numbers on the cards this time?

$$\begin{array}{rcccl} & & \square & + & \square & + & \square & = & 6 \\ & \square & + & \square & + & \square & + & \square & = & 30 \\ & & \square & + & \square & = & 9 \end{array}$$
