

**you need:**

- 1–9 digit cards

# Multiples grid

Place one card in each box so it fits the labels of both the row and the column it is in.

	Factor of 56	Factor of 30	Factor of 36
Factor of 35			
Factor of 24			
Factor of 54			

Is there only one way to do it?

Now make up a puzzle like this for a friend to do.
