

**you need:**

- two 1-6 or 0-9 dice
- two pens in different colours (one each)
- calculator

# Add or subtract for 2 players

**Aim**

You are aiming to make the running total a multiple of 5 or 10.

The game starts with a total of 50.

**When it's your turn**

Roll the dice and arrange the numbers to make a two-digit number

Add this to, or subtract it from, the running total.

If the new total is a multiple of 5 or 10, you score a point.

**The end**

Whoever gets most points wins the game.

**Sample game**

Ahmed rolled 4 and 1. He made 14, added 14 to 76 - and made a multiple of 10.

So he scored a point

number made with dice	+ or - ?	total so far
		50
<b>26</b>	<b>+</b>	<b>76</b>
<b>14</b>	<b>+</b>	<b>90</b>

number made with dice	+ or - ?	total so far
		50
the winner is.....
