

you need:

- calculator
- counters
- pencil and paper

Divide and rule for 2 players

First of all

Make two columns to record your scores.

When it's your turn

Choose two numbers and put counters on them.

Use the calculator to divide the larger number by the smaller.

Those numbers can't be used again.

If the answer is a whole number, add that number to your score.

If it is a decimal number, the game is over.

The rest of the game

Go on until the numbers run out or one player makes the calculator show a decimal number. Now the game is over.

The winner is the player with the higher score.

Ellie	Isaac

24	36	48	40
30	24	28	32
18	20	21	42
9	8	3	7
5	6	6	4
3	3	4	5
