Aim

In this game you aim to win any 5 squares in the same row or column.

When it's your turn

Roll both dice and

- arrange the digits to make a two-digit number
- double that number
- cross out that number on the grid using your colour pen

The end

When one player has crossed through 5 numbers in the same row or column, the game is over.

Sample game

Ahmed was drawing crosses and Ben was drawing circles.

Ahmed put crosses on 5 numbers in the twos column, so he won the game.
