

you need:

- a bean
- 16 counters
(8 in each of two colours)

Three in a line

for 2 players

First of all

Each player takes 8 counters in one colour.

Put the bean on the star.

When it's your turn

Move the bean one or two steps round the circle – you choose.

Say something about the shape where the bean lands.

Put a counter on that shape on the grid.

The end of the game

The first player to get three counters in a line wins the game.
