

**you need:**

- 16 counters

# Last one wins

 for 2 players**First of all**

Arrange the counters in rows like in the diagram. (You could put out the counters on top of the diagram.)

**When it's your turn**

Choose a row. Take as many of the counters in that row as you like.

When it is your turn, you **must** take some counters.

**The end of the game**

The player who leaves just one counter on the board wins the game.
