

you need:

- counters
- 1-6 dice

Coin purses

First of all

Decide who has which purse.

When it's your turn

Roll the dice and say the number.

Find coins in your purse worth that number of pennies and cover them with counters. (For example, you roll a 4, and cover two 2p coins.)

If you can't cover the correct value exactly, put one counter in the collecting box instead.

The rest of the game

Go on until one player runs out of coins.

They win the game.
