

**you need:**

- 12 counters in two colours (6 of each)

# Lines of money for 2 players

## When it is your turn

Put a counter in your colour on the grid, on any square.

## The end of the game

Keep playing until your counters run out.

Both players, choose any straight line of your own counters and add up the amounts of money covered. The line must be horizontal or vertical.

Who has the larger amount? They win.

## Sample game

Grey chose a line worth £1.95.

Black chose a line worth £2, so Black wins.
