Connect three: money for 2 players

First of all
Decide who has which colour of counter.

Put the paper clip here.

When it is your turn
Move the paper clip one or two steps round the loop and say the amount where you land.

Put a counter on the grid, on a square showing that amount.

If there is nowhere to put your counter, move the paper clip one more step.

The rest of the game
Keep playing until your counters run out.

Both players, choose three connected counters and add up the amounts of money covered.

Who has the larger amount? They win.

one or two steps

1p 2p £1 50p 10p 20p 5p £2

Sample game
Grey scored £1.55.
Black scored £2.52, so Black wins.

10p	£1	£2	50p
