Counter for each player and a dice (4, 5, 6, 7, 8, 9)

1. All players start on 12
2. Roll the dice and divide the number your counter is on. If there is a remainder, move your counter forward the same number of spaces as the remainder.
3. If there is no remainder, your counter does not move.
4. To finish, a player must move the exact number of spaces left.
